## **Summary**

This document contains an overview of the research project “A Comparative Study of Disruptive Behavior between Schools in Norway and the United States”. The project was a collaboration between Norwegian and American researchers. The project aimed to enhance our understanding of problems and challenges related to disruptive behavior in schools. The project included a qualitative and quantitative component. The qualitative component consisted of observational studies conducted by master’s students from the Department of Special Needs Education, University of Oslo, aiming to identify categories of disruptive behavior in schools. The quantitative component consisted of a student survey including the identified categories. The survey aimed to examine the prevalence of disruptive behaviors as well as how students and teachers react towards these kinds of behavior.

*The results from the study* indicate that most students in both countries had been disturbed by disruptive behavior and that this occurred on a nearly daily basis, this could help to underline that the issue of disruptive behavior is one of the greatest challenges in schools today. In both countries, reactions from teachers only partially reduced disruptive behavior, there is a need for further research on how teachers cope with disruptive behavior.

## **Summary**

The research project “Teachers’ Skillful Coping with Disruptive Behavior in Norwegian and American Classrooms” is led by Professor Liv Duesund, Department of Special Needs Education (DSNE) / Department of Sociology, University of California, Berkeley (UCB) and Associate Professor Magnar Ødegård, Department of Education, ICT and Learning, Østfold University College. The project is comparative and aims to examine how teachers experience, and cope with, disruptive behavior in their classrooms. The project is approved by the Committee for Protection of Human Subjects (CPHS), Office for Protection of Human Subjects (OPHS) at UCB. The approval is in effect from 2020-2030.

## **External funding**

- Peder Sather Center for Advanced Study, University of California, Berkeley
- Norwegian Research Council
- Norway House foundation in San Francisco
- The Norway-America Association (NORAM)

## **Student involvement**

The student involvement has led to breadth in the topics addressed in the project. Amongst the topics related to the project, we find (1) Phenomenological perspectives (the Skill Model: From Novice to Expertise; Phenomenology of the Body and Being-in-the-world), (2) Mentalization, (3) Classroom Management, (4) Teacher-student relationships, (5) Teachers’ professional competence, (6) Disruptive behavior and gender, and (7) Information conversations between teachers. The following students have been involved in the project: Jeanette Erlandsen (UCB) Therese Wirén, Sondre Stranden Fagerli, Lina Sletholt (UCB), Heidi Ophus Østvang (UCB), Olja Vukovic (UCB), Hanna Amalie Hveem, Kine Solberg, Hedda Caroline Lunke, Lisa Ellinor Haugen, Thea Helen Mentzen, Synneva Opheim Dale, Karina Leonhardsen, Maiken Hensrud, Bente Hagen, Andrea Sagen, Malene Folkvord.

A total of 17 students have participated in the project so far. One student is participating in spring 2021.
