In this course we will investigate the contradictions and possibilities of education. Throughout the course students will learn some basic facts of education and its organization in the United States, orienting perspectives and theories for understanding the way education works, and then a selection of specific issues in education.

The aim of these efforts is threefold. As one might imagine, one course aim is that students learn particular substantive facts about education. A second aim is that students learn a range of theoretical perspectives analysts have developed for considering education and society. A third aim is that students become adept at evaluating evidence bearing on the relation between substantive facts and theoretical perspectives. The first aim is important, but it is the second and third aim that sets our work apart and makes it a college-level course. Consequently, the point is not only to learn facts, but also and most important, to be able to marshal those facts to evaluate other claims, and to sensitively weigh evidence.

Assignments

There are three kinds of written assignments: Quizzes, Mid-terms, and a Final Exam.

Quizzes

Pop quizzes will be assigned throughout the term. A quiz may occur at any time during class. Further, a quiz may occur in parts during a single class or multiple classes—part 1 might be assigned at one point during the class period, while part 2 might be assigned at another point, and third, fourth, or additional parts might be assigned later. Part 1 one might occur in one class, and a subsequent part might be assigned in another class. Failure to complete all parts of a quiz result in a zero score for that quiz for the student. Further, continuing to work on the quiz when time is up is also reason for the grade on the quiz to be zero. Other rules to assure the fairness of the quiz for all students may be applied as the term unfolds.

Mid-terms

There are three mid-terms. They are September 19, October 19, and November 21.

Exam

The final exam will be administered during the time assigned for our final exam, during which you will be asked to answer one or more essay questions at the exam. The content of the exam is cumulative.

Grade Percentages for each Type of Assignment

Each mid-term counts 20% for a total of 60%. Collectively the quizzes count 20%. The final exam counts 20%.

Lectures

Lectures will generally provide new information, and elaborate or extend the reading, not repeat it. Please complete the reading assignment for the date before class meets.

Books and Articles for the Course

Much of the reading material is available via JSTOR, Google Scholar, or via OskiCat, and some of the other material is available at specific web-sites (e.g., my web-site). The readings that are at specific non-JSTOR sites are generally available to the public. The general public does not have access to JSTOR or much of OskiCat, but if you are a student at UC-Berkeley you have access to both. JSTOR and OskiCat are accessible from university computers; if you prefer to access these sites from home you need set up a proxy server. University web-sites contain information on how to do that for the different types of computers one might use.

I strongly encourage you to become familiar with JSTOR, as it will serve you well. Of course, almost everything available via JSTOR is also available in hardcopy in the various libraries at UC-Berkeley. Thus, you need not have JSTOR access to obtain the JSTOR course reading.

Papers that are on publicly available web-sites have the url in the syllabus, while papers on JSTOR or OskiCat are noted in the syllabus with a bold JSTOR or OskiCat after the citation. For the JSTOR and OskiCat papers you'll need to use the search tools of the site to find the paper. For JSTOR the author or title are needed. For OskiCat first find the journal, then find the appropriate electronic location of that issue, and then a search using some information from the citation (e.g., author, title) will be needed.

Some articles are not available electronically; those papers are in a Reader for purchase at Copy Central, 2560 Bancroft. Papers that are in the Reader are noted in the syllabus with a bold READER after the citation. These articles may be less common on the syllabus, but they are essential (or I would not assign them given the extra drudgery of making them available). Thus, I encourage you to obtain the Reader as it is likely by far the easiest way of obtaining access to these materials.

There are also 3 books on the syllabus:

Bowles, Samuel, and Herbert Gintis. 1976. *Schooling in Capitalist America*. Chicago, IL: Haymarket Books.
