Course Description:

This course is an introduction to urban sociology that frames cities as physical spaces that magnify social inequalities and shape how we experience them in our daily lives. Although people may live in the same city, their daily experiences of place and private and public spaces are often radically different within short distances. In this class, we will explore why this is—how our experiences of the city vary so widely depending on where and who we are—and how where we live and conduct our lives shapes other aspects of them. We begin the course by considering research on how and why residential environments matter, and then turn to understanding the historical forces that shaped U.S. cities and led to such unequal spaces. We then explore how that history continues to shape and inform current urban experiences and controversies as we focus on the contemporary urban landscape and on topics typically considered as urban problems—homelessness and neighborhood violence. Our final topic will be to consider how the unfolding climate crisis is likely to deepen existing spatial inequalities in urban places. Throughout the course we will consider the relationships between spatial organization, social inequalities and social interaction.

The central questions we will address in this course are:

- How did our present urban social and spatial dynamics come to be and why do they matter?
- What are current trends in urban areas?
- What were/are important influences on these processes, and how are current trends related to the history of urban areas and places?
- How does the spatial organization of urban areas influence social interaction, both in general and in specific urban places?
- Can sociological research help us better understand the seemingly intractable problems of urban violence and homelessness?

By taking this course, you will:

- o Learn how economic forces and social structures such as race, class, government policies and citizen activism influence how cities are socially and spatially organized, and how that has changed over time.
- o Learn about how urban living shapes social interaction, past and present by focusing on specific examples in urban places.
- o Consider how policies contribute to creating and solving urban problems.
- o Gain experience with using and applying census data in sociological analysis.
- o Gain experience with ethnographic observation.

Films: We watch several films (or excerpts) over the course of the semester to provide examples of concepts from lecture and readings, and to explore some topics in more detail. You should think of the films as “required” course materials; if you miss one, you should watch it. Details about films will be on the weekly pages.

Assignments and Academic Expectations:

Take-Home Midterm and Final Exams: (each exam is 20% of grade) These are essay exams that will test your comprehension of course material and ability to apply theories and concepts as well as synthesize and make connections between readings. Questions and instructions will be posted one week before each exam is due.

Urban Renewal Revisited Paper: (25% of grade) The first paper will consist of a profile of a neighborhood in Oakland or San Francisco that was a site of a past urban renewal effort based on your own ethnographic observations, U.S. Census data, and other sources, along with an analysis of salient issues currently facing the neighborhood and city in which it is located.

Urban Problems and Policy Paper: (25% of grade) This paper will be an in-depth investigation of one of the neighborhood problems we cover in this course from a policy perspective: gentrification and displacement, affordable housing shortages, homelessness, urban violence or the climate crisis. This paper will require students to engage in fieldwork and independent research about their topic as well as engage with class materials.

Response and Reflection Papers: There will be four short reflection papers due during the semester. The purpose of these papers is to create a space for students to reflect on their personal reactions and responses to the course material. These

papers will be contract based, in terms of evaluation (i.e., you will get full credit if you follow instructions and make a good effort). If you miss one of these assignments during the semester, you can make it up during RRR week.

Due Dates:

Take-home Exam: due Feb. 24, 10:00pm

Urban Renewal Revisited Paper: due Mar. 17, 10:00pm

Urban Problems and Policy Paper: due Apr. 21, 10:00pm

Take Home Final Exam: due May 11, 2:30pm (*note the unusual time!*)

Response and Reflection Papers (4): due Feb. 1, Mar. 8, Apr. 6 and Apr. 26

Reading: Much of the work of this class consists of keeping up with and mastering the content of the assigned readings. There are four required books that you can purchase at the bookstore or from online sources. These books are also available as e-books through the library. Other readings will be posted on bCourses. You can find them in two places: by clicking “Files”> “Readings” and then the folder for the week, or by going to “Pages” and clicking on the appropriate page for the week. Bound hard copies of course readings (the “course Reader”) that are not the required books can be purchased at the Copy Central Store at 2411 Telegraph Ave. While not required, I strongly advise investing in your learning this semester by purchasing one, in addition to the books. Numerous studies have shown that we retain material better when we read it offline. Also, you don’t need internet access or a functioning computer to do the reading and stay caught up! Please note that the four required books are NOT included in the volume that is for sale at Copy Central. Both print and digital versions are available.

For any given week, please read in the order listed on the syllabus. Readings are assigned for the week, rather than by the day, to allow for more flexibility in the class. That said, we will generally consider them sequentially. In general, try to complete the first reading before Tuesday’s class, and everything before Thursday.

Films: We watch several films (or excerpts) over the course of the semester to provide examples of concepts from lecture and readings, and to explore some topics in more detail. You should think of the films as “required” course materials; if you miss one, you should watch it. Details about films will be on the weekly pages.

Attendance: This is an in-person class and consistent attendance is a basic academic expectation. If you are not able, or not planning, to come to class regularly then please drop the class now. To reward students for attendance, we will have periodic random

attendance checks for which you will earn extra credit points. This class will **not** be recorded by course capture.

Email: Make sure to check the course syllabus, bCourses pages and announcements before emailing me about an assignment or administrative matter. It is best to ask questions about these things before or after class or during office hours. Please understand that I receive many emails from students and am not always able to respond right away. Do not expect a response after working hours or on weekends.

Office Hours: I encourage you to visit me in office hours sometime during the semester. I enjoy getting to know you and your interests in the course and this is a way to make a large class more personal. Please come see me especially if you are having trouble with the course. I can't help you if you don't communicate with me! My office is shared, so if you need to speak with me confidentially, please try to let me know ahead of time so I can try to ensure privacy. If you cannot make these office hour times, please contact me to make another arrangement.

Grading Policies:

Readers: Graduate student Readers will do the bulk of the grading for this class. We will all work together to make sure the grading is as consistent and equitable as possible. Around the second or third week of the semester, students will be assigned a Reader that will be their primary contact for dealing with administrative matters around DSP extensions, other extension requests and other issues. This same person may grade all or some of your assignments.

Due dates and Grace Period: All assignments will have a due date, as usual. However, in the spirit of offering more flexibility to everyone, there will be a grace period that will extend for 24 hours after the deadline. An assignment turned in after the official due date, but before the end of the grace period will not be considered late. The grace period extends to all students and all assignments—you do not need to ask for permission or notify us if you plan to turn in work during the grace period.

Late Assignments Policy: If you have a personal emergency or are ill, contact your Reader at the *earliest opportunity* about an extension. Unexcused late assignments will be marked down 5% for each day after the grace period of 24 hours expires. At times, we may request documentation of an illness, emergency, or other situation.

Grading scale: Grades are not curved for this class and I use the typical letter grade scale when calculating grades, where an A is 93% and above, and A- is 90-92%, a B+ is 87-89%, a B is 86-83%, a B- is 82-80%, etc. If you are taking this course for P/NP credit, you need to earn a minimum of 70% to pass.

Academic Accommodations: Ask for accommodations if you are a DSP student (according to your LOA). Make sure that the DSP office has sent me a copy of your

letter. If you have an accommodation for take-home assignments, it is your responsibility to contact your Reader to ask for an extension. Please bear in mind that accommodations for extra time on in-class exams do not apply to take-home assignments. You are always welcome to reach out to me to discuss accommodations. Accommodations are also available for the observance of religious holidays, or due to conflicts related to student athletics. Please reach out to me if you have another issue not “officially” covered and we can talk about it. Here is a link to more information from UCB about academic accommodations and resources:

<https://evcp.berkeley.edu/programs-resources/academic-accommodations-hub>

Re-grade policy: Please first talk with the person who graded your assignment for more feedback. Readers have the authority to change grades if they believe it is warranted. If you believe a mistake was made on your assignment, and want me to review it, write a short statement explaining why you think your assignment deserves a different grade, making sure to reference the assignment rubric. This statement should be about the substance of your work, rather than effort. I will then re-grade your paper and determine the final grade for the assignment. All re-grade requests must be made within a week of when an assignment is handed back. Per University policy, no re-grades are possible for final exams.

Incomplete Grades: Incompletes are an option of last resort for students experiencing true medical or other emergencies that make it impossible for them to complete their coursework on time. To be considered for an incomplete grade, students need to speak with me about it by the end of RRR week, have completed at least half of the coursework, and provide documentation of the reason for the request.

Academic honesty is expected of all students. It is extremely important that everyone submits their own original work, produced specifically for this course, in order to receive credit. Suspected violations relating to this course will be reported to the office of student conduct and dealt with according to university policies. *Be aware of plagiarism.* Word for word use of even a single sentence from any author, publication or website without proper citation is plagiarism and is unethical and unacceptable. So is very closely following the structure and wording of another author’s work. So is using an AI program to generate an essay or text. In addition, please be aware that you may not turn in any portion of *your own* previous work submitted for credit in another course without substantial revision. Plagiarism will result in a failing grade on the paper or exam in question with no opportunity to rewrite, as will any other kind of academic dishonesty. If you have questions about how to properly cite materials, or how to paraphrase appropriately, please ask! The student writing center is also a good resource for questions about this.

Turnitin: All of your assignments will be checked for plagiarism by Turnitin. Please be aware that this program keeps a database of work previously turned in for this class by other students, as well as any of your own work that you turned in for credit in a previous class.

Names and Pronouns: You have the right to be referred to by the name you prefer and with the correct gender pronouns. Because the name listed in university records may not correspond to your preferred name, please inform me of your name (and pronunciation) and your pronouns so that I can ensure you are properly recognized and respected. You can refer to me as Prof. Reed, Dr. Reed, or Joanna. My pronouns are she/her.

Notes and Circulation of Course Materials: DO NOT reproduce course materials or post them on-line or anywhere else. This includes the syllabus, lecture slides, your notes, handouts, rubrics and exams. While you may share your notes with other students in this semester's class, it is against university policy to share your notes broadly or attempt to use them for commercial purposes. It is also a violation of the policy to record lectures without my consent, and/or try to use recordings for commercial purposes. Please see <http://campuspol.chance.berkeley.edu/policies/coursenotes.pdf> for a detailed version of the policy.

University Resources for Students

Your Health and Well-Being: Life as a college student can be full of excitement and possibilities, but at times may feel overwhelming or be difficult in other ways. New challenges and situations are an opportunity for learning about yourself, the world and the kind of life you want to live and some degree of discomfort and adjustment is to be expected. However, if you are experiencing distress or anxiety to the extent that it is negatively affecting your academic and social life, or have a pre-existing mental health issue, there are resources on campus to help. You are not alone; many others share your difficulties. Even if you don't think you need them, I encourage you to look at these websites now, so you know what is available. In addition to counseling appointments there are web tutorials and videos, support groups and mindfulness classes. Counseling center staff have told me these groups and classes can be a great preventative resource, and are a great way to get the semester off to a good start. Counseling and Psychological Services (CAPS), (510) 642-9494, <https://uhs.berkeley.edu/counseling>. More general resources on mental health, services are at <https://uhs.berkeley.edu/health-topics/mental-health>. Remember that regular exercise, getting enough sleep, healthy eating, getting together with friends in-person to have fun and not spending too much time online/on your phone are important ways to support mental health.

Student Learning Center: "The primary academic support service for students at Berkeley, the SLC helps students transition to Cal; navigate the academic terrain; create networks of resources; and achieve academic, personal and professional goals."

Sexual Harassment and Violence Support Services: To learn more about these issues, how to support survivors, or how to file a report and receive support services, start here: <http://survivorsupport.berkeley.edu>.

Please note that I am not a confidential advocate; I am a mandated reporter. You can speak to a Confidential Care Advocate.

Undocumented Students can find university resources and support at:
<https://undocu.berkeley.edu/>

Economic, Food, and Housing Support: If you need economic, food, or housing support, you can seek help at the Basic Needs Center (<https://basicneeds.berkeley.edu/home>).

Technology resources and support for students: Please see this page for the latest information on university-provided support, including borrowing laptops and other equipment from the University: <https://studenttech.berkeley.edu/home>

Names and Pronouns: You have the right to be referred to by the name you prefer and with the correct gender pronouns. Because the name listed in university records may not correspond to your preferred name, please inform me of your name (and pronunciation) and your pronouns so that I can ensure you are properly recognized and respected. You can refer to me as Prof. Reed, Dr. Reed, or Joanna. My pronouns are she/her.
